## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-18 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for stable agricultural solid suspensions comprising ammonium sulfate, diammonium phosphate or the isopropylamine salt of N-(phosphonomethyl)glycine, does not reasonably provide enablement for stable agricultural suspensions comprising all agricultural compounds. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. Note agricultural actives differ structurally and their structures determine their chemical and physical nature. Their chemical and physical nature affects their interaction with other components such as methylthio-alpha-hydroxybutyric acid, instant nonionic surfactants and water-soluble glycol liquids. For this reason it is unbelievable on its face that all agricultural actives would possess chemical and physical chemicals that would allow for the production of a stable solid suspension once combined with methylthio-alpha-hydroxybutyric acid, instant nonionic surfactants and water-soluble glycol liquids.
